Subject: Detrex Gluten Free Status Statement

To whom it may concern,

Gluten is a protein composite found in wheat and related grains. Gluten is present in certain foods and may be added to other foods during processing. Hydrochloric Acid is not a food but can be used in food production as a processing aid.

Detrex Hydrochloric Acid products are manufactured from synthesized or manufactured pure chemical elements. Detrex has not conducted specific testing, but to the best of our knowledge there are no gluten compounds in our products, or the precursor materials used to manufacture our products. Detrex does not add any gluten during our manufacture, storage, or packaging operations.

Our product is, to the best of our knowledge, Gluten Free.

Sincerely,

A handwritten signature in black ink that reads "Dave Morgan". The signature is fluid and cursive, with the first name "Dave" being more prominent than the last name "Morgan".

Dave Morgan
